Our Centre's participation in the event was a significant success, as we reached and provided free-of-charge health education and community screening services to almost 800 individuals from the 50+ age group, a potentially high-risk group. This achievement demonstrates the high acceptance of our work by the event participants. It served our objective to deliver proper, professional, reliable, and evidence-based education to those concerned about bone & muscle health and prevent old-age falls and fractures in our society. Kindly note that all our services and educational materials are medically validated.

Our Physicians' health talks received very positive and interactive feedback from the audience. Our doctors addressed very good questions from the floor of over 250 pax in the two days.
